VOLUME EIGHT.

STONY PLAIN, ALBERTA THURSDAY, NOV. 10, 1927.

Whole Number 379

Investments for Young Men and Women on Farms.

With the approach of Fall one's thoughts naturally turn to the winter months which will surely follow and the resulting easing off from work on the farm.

Are you needed on the farm the coming winter months? Whether your answer be in the affirmative or in the negative, the Principal of the Olds School of Agriculture has a proposition to make to you—the outline of an investment of a small amount of money and of your spare time. An investment which will give not only pleasure and profit during the coming winter, but a return which will endure through your entire lifetime.

If you are needed on the farm, the 3700 books of the library of the Olds School of Agriculture are at your disposal for the small yearly fee of \$2.

The regular course at this school consists of 2 sessions of 5 months each, opening this year Nov. 15, closing on Mar. 29, 1928.

The ability to read and write, the only entrance requirement.

The minimum age for entrants is 16 years.

The school course is entirely free.

The new dormitory provides accommodation for 80

Wheat Pool News Notes.

The string of 155 Alberta Wheat Pool elevators established something of a record when they reported handling 670,000 bu. in one day.

The annual meeting of the Alberta Wheat Pool will be held Wed. Nov. 23, in Calgary. Reports for the year will be presented to the Pool delegates.

H W Wood, chairman or board of directors of Alberta Wheat Pool, told the Calgary Kiwanis club in the course of an address, that if the farmers cannot sell their own wheat scientifically there is little hope for agriculture in Canada.

Construction has started on the foundation of the new 3,400,000 bu. Pool terminal at Vancouver. It will be ready for the 1928 crop, and will cost two million dollars.

women and 100 men at \$30 a month.

The Courses are: Domestic Science for women; Agriculture for men.

Grade XI graduates may enter the second year of the course.

A Special Matriculation Course is given for those having completed the two-year course, which is equivalent to the first year of the University.

If you are interested, the Principal will be pleased to send you a Calendar and any further particulars respecting the School.

LOCAL NEWS.

Mr and Mrs Carl Enders returned on Tuesday morning from their honeymoon. Carl has a business proposition in Stony Plain under consideration.

Mr Chas Cheesser, the ball player, who had been spending the summer in the mountains, was a visitor in Stony this week.

Mr Art Ingle left Sunday for Outley, with a hunting party.

A flock of students from the City and elsewhere came back to their homes in this district over the week-end for Thanksgiving festivities.

Herb Wolfe's ice committee of the local Skating Club are working diligently on getting the skating rink ready for the members. The ice area has been enlarged, for this season, and hopes are expressed that the skating will start up soon.

A movie picture show is billed for Wudel's hall on Thurs. Nov. 17.

The shoot held on the holiday by the members of the local rifle club, proved to be a very interesting event, with a goodly number of competitors present. High scores were made. A full report of the meet will appear in the next issue of The Sun.

If your eyes bother you, or you suffer from headaches, why not have your eyes attended to by an expert? M M Mecklenburg, eye specialist, will be in Stony Plain on Friday, Nov. 25th.

Inga Councillors Meet.

Inga Councillors met in Stony Plain on Friday, Nov. 4th, with all the Councillors present and Reeve McKinlay in the chair.

The minutes of the previous meeting were read by the Secretary, and these were adopted as read.

Pay sheets for road work done was the order of the day, and took up considerable of the attention of the Councillors.

A delegation of one was present from Glory Hills North regarding the building of a road two miles west, for the accommodation of the settlers there. This matter was referred to the Councillor in whose division it is situated.

A discussion took place on the pounds in the various divisions of the Municipality; and one ratepayer was present to present his claim for damages received when stray horses broke into his grain field and did damage to the extent of \$15. He had put the bill in to the poundkeeper when the animals were impounded. A report from the poundkeeper is awaited, when a settlement will be arrived at.

The next meeting of the Councillors will take place on Friday, Dec. 2nd.

RED ROSE TEA

RED ROSE ORANGE PEKOE is extra good.

A Good Deed

It was our pleasure, says a writer in a New York paper, to meet with the Boy Scout spirit, fully matured, aboard a Long Island train recently. At one of the stations the gentleman seated in front of us accidentally dropped a glove out the window just as the train started to move out. Without a moment's hesitation he tossed the other one after it. Moved by curiosity, we dropped all reserve to ask him why he had done so. He courteously explained that the one glove that remained would have done him no good; nor would the lost glove have done the finder any good. This being the case, he had tossed out the other, so that the finder might have a complete set.

The viewpoint and line of conduct of this man might well serve as an object lesson to many, adding contentment in their own lives and conferring benefits on others. The average person, it is to be feared, would have grumbled and bemoaned his loss—small though it be—and generally made himself and possibly others miserable for a time, and at no end. But the hero of this little incident, which might have passed unobserved, enjoyed a brighter outlook on life and a finer conception of things generally. He had sustained a loss which, under the circumstances existing, could not be restored. He realized on the instant that he must accept that loss. His immediate thought was as to how his loss could be turned to somebody's gain.

If in family and community life and activities the spirit displayed by this unknown man became the inspiration of our thought and the guiding motive of our actions, how much happier this old world would become. What contentment of spirit and real joy in living would be experienced by those who adopted and followed such a policy of unselfishness, resulting in an inner gain of satisfaction far outweighing the outward and material loss sustained.

Such a spirit and code of conduct costs nothing, and how much more satisfactory all round it would be to that usually followed by which a loser determines that if he must lose, or has lost, he will at least have the satisfaction—poor though it be—that nobody shall be the gainer thereby.

There are people no doubt who are inclined to belligerence and scoff at the insignificance with which members of the Boy Scout organization are taught to be watchful for opportunities for helping others in order that they may do at least one good turn a day. But if more people would strive for just one week to emulate these Scouts and do good turns to others, they would quickly discover a new richness and joy in their own lives while at the same time happiness and gain would be conferred on others.

The people of Canada have just observed a day of National Thanksgiving and in a few weeks all Christendom will be joyously celebrating the happiest day in all the year—Christmas. Many may have sustained losses and suffered deprivations in the months that are passed without making the slightest effort to extract such profit as they could from their loss and without turning defeat into ultimate victory. Possibly they are still bemoaning the sad fate which overtook them, feeling sorry for themselves, and declaring that luck is against them. Such an attitude will avail nothing; it merely makes for further discontent, discouragement, and additional failure and loss. Such an attitude is taking the joy out of their own future lives and making for unhappiness and misery for others.

Let the dead past bury its dead. Forget your losses and disappointments except as they can be capitalized to realize future gains, if not for yourself, then for somebody else. In the long run this will mean gain for you.

Decorate Nelson Monument

Custom Observed On Anniversary Of

Historic Victory

On the anniversary of the Battle of Trafalgar, the monument to Lord Nelson in Trafalgar Square, as is customary on this date, was bedecked with laurels. Nowadays the monument has become a sort of cenotaph for wreaths placed there to honor the fallen heroes who suffered beneath the waves in the Great War.

Nelson's flagship Victory, which is now permanently drydocked at Portsmouth, still is undergoing restoration. Her topmasts and masts have not yet been replaced, so Nelson's famous signal, "England expects that every man will do his duty," flew from the nearby signalling school.

At the dinner given by the Navy League Earl Beatty, former Admiral of the fleet and First Sea Lord, presided.

Does Ill Health Detract From Your Good Looks?

Hamilton, Ont.—"I was in a rundown state of health, my nerves were bad and I suffered from back-aches and pains in my side, which would be so severe that I would get weak and have to lie down. I could not eat without being distressed. Upon the advice of a relative I started to take Dr. Pierce's Favorite Prescription and

it relieved me of all distress, and I do not suffer in any way from any of the above conditions. I have a good appetite and my nerves are in good condition. I am strong and healthy in every way."—Mrs. George Turansky, 373 Ferguson Ave. North.

Sold by dealers. Fluid and tablets. Send 10c for trial pkg. tablets to Dr. Pierce's Laboratory, Bridgewater, N.H.

Fokker Foresees Millions Of Planes

Aviation Is Great Factor For Peace

Says Designer and Builder

A million or more planes blackening the air over America, from flierless planes, in which the young man can take his sweetheart for a ride in a dual control side-by-side cockpit, to giant multimotored air transports, are pictured by Anthony H. G. Fokker, at a luncheon of the Netherlands Chamber of Commerce of New York.

Mr. Fokker said the development of commercial flying was closely linked with military aviation and that the nations of Europe had realized this. The subsidies granted to air transport lines in Europe for commercial purposes, he said, were part of the general preparation plan for wars where by pilots would be trained and fields, hangars and workshops provided for future military use.

"Aviation is the cheapest and most efficient method for killing people," Mr. Fokker said. "In a city like New York bombing planes loaded with gas bombs could destroy a million persons absolutely without fail. So important will aviation be as an offensive weapon in another war and so great is the range of planes that the safest place for men will be the front line trenches."

The designer suggested that aviation was a factor for peace by its very deadliness as a potential weapon of offense.

"Men are not so likely to start a war to help born one going," he said, "when they realize that nowhere can they find safety for themselves. The man who stays away from the front to manufacture shells and guns on war contracts will be in more danger than the man at the front."

On Ladies' Toes Are Sore Corns

Quick safe relief is almost instantaneous if you apply Putnam's Corn Extractor. Sore corns don't pinch or hurt any more. One single drop of Putnam's stops the pain. A few applications make the corn dry up and drop off. Putnam's Corn Extractor gives satisfaction. Thousands use it every day. Get a bottle from your druggist. Refuse a substitute for Putnam's.

Tells Why Germany Failed

Ex-Kaiser Says People Did Not Sacrifice Enough

In an interview with George Sylvester Viereck, printed in Liberty, Wilhelm Hohenzollern, formerly German war lord, tells why Germany lost the war.

"Because we did not obey God in all things; because we hesitated to bear the worst; because we refused in the end to face all risks in preserving faith! The German people performed miracles of endurance, but at the last they failed. The supreme miracle can be accomplished only by faith. We should have fought to the very last carot, the very last man, the very last round of ammunition."

The ex-emperor is a pretty one to talk about fighting to the last carot! The German people had indeed performed "miracles of endurance." They had sorrowed over their losses and mumbled their black bread patiently enough. It was their leader, their emperor-king, who by his midnight departure for Holland set them the example of submission to stern fate.

Wilhelm had plenty of carrots. He had caviare and champagne. He had abundance while his people starved. He had millions in the midst of beggary. He had six tall sons, carefully protected during a time when grass grew green on many new graves. For him, now, to blame the German people for "hesitating to bear the worst" for "refusing in the end to face all risks," is, perhaps, no more indecent than might have been expected—New York World.

Requisite On The Farm.—Every farmer and stock-raiser should keep a supply of Dr. Thomas' Electric Oil on hand, not only as a ready remedy for ills in the family, but because it is a horse and cattle medicine of great potency. An substitute for sweet oil for horses and cattle affected by colic that far surpasses anything that can be administered.

Most Northerly Post

The Canadian Government post at Ilache Peninsula, on the east coast of Ellesmere Island in the Arctic, is the most northerly police post, post office and custom house in the world. It is 755 miles (456 nautical miles) from the North Pole.

posed a toast to "The Immortal Memory of Lord Nelson." That Beatty was supported in the toast by the oldest living admiral the Hon. Sir Edmund Robert Fremantle, who is in his 82nd year.

All Night With Asthma. Everyone knows how attacks of asthma often keep their victims awake the whole night long. Mornings find him wholly unfit to undertake his day's business, and yet, business must still be carried through. All this night suffering and lack of rest can be avoided by the prompt use of Dr. J. D. Kellogg's Asthma Remedy, which positively does drive away the attacks.

Standard Too High

Author Receives Courteous Rejection Slip From Chinese Publishers

John K. Williamson of Detroit, who is stopping in London, has received the price rejection slip of Chinese publishers. "We read your manuscript with boundless delight," wrote the Chinese firm. "By the sacred ashes of our ancestors we swear that we have never dipped into a book of such overwhelming mastery." If we were to publish this book it would be impossible in the future to issue any book of a lower standard. As it is unthinkable that within the next 10,000 years we shall find its equal, we are, to our great regret, compelled to return this too divine work and beg you a thousand times to forgive our action."

Proud Of Waiter's Job

Has Given Him Self-Respect Says

Russian Noblemen

A six-footer of aristocratic mien at the Waldorf, New York, also distinguished by a spike-tailed coat with gold braid, has identified himself as William Schurch de Witte, famous premier under the Czar. He is now a floor waiter, having worked up in six months from kitchen boy.

Proud of his job, he says: "I have more self-respect than when I was playing bridge or attending tea parties in New York City." He kept his incognito until recognized by a woman guest of the hotel whom he had met socially, he says.

It's no trouble at all to find trouble.

Clever Deaf Children

Band Of Twelve In Wisconsin School

Give Concert

A band of twelve small totally deaf children, who devote their entire energy to producing a perfect rhythm and ignore the matter of melody, has been organized in the Wisconsin School for the Deaf and is the culmination of an interesting experiment in instruction.

The children recently gave a concert in which they played a march, a dance, and a lullaby with three drums, one set of jingle bells, one cymbal, two tambourines, two triangles, and two miniature xylophones.

Fish rise and fall in the water by means of an air bladder inside them.

WARNING!

Beware of Counterfeits

There is only one genuine "ASPIRIN" tablet. If a tablet is offered as "ASPIRIN" and is not stamped with the "Bayer Cross"—refuse it with contempt—its "ASPIRIN" at all! Don't take chances!

Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 12 tablets also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacturing of Monoclonal-acid of Salicylic Acid (Acetylsalicylic Acid, A. S. A.). While it is well known that Aspirin means Bayer manufacturing, to assist the public against imitations the Tablets of Bayer Company will be stamped with their central trade mark, the "Bayer Cross."

Growth Of Canada's Trade Has Not Been Surpassed By Any Other Country

A survey of Canada's material and spiritual development in the past 60 years, an optimistic outline of what the future holds in store for the Dominion, and a tribute to those who were contributing towards further cementing the friendly relations that have existed between Canada and the United States for over a century were given by the Hon. J. E. Macdonald, Minister of Trade and Commerce in the Canadian Government when he addressed a largely attended meeting of the Canadian Club of New York. Mr. Macdonald quoted widely from figures that showed Canada's continued trade expansion and drew from them the lesson that with the same industrious application to the arts of peace in the future, the Dominion could not fail to achieve great things.

Touching on Canada's growth, Hon. Mr. Macdonald said too many were inclined to judge progress of a country by growth of population alone, which was not always a sound basis. In Canada material advancement had been much more rapid than increase of population and in no direct ratio thereto. The standard of citizenship in a country was of vastly more importance than density of population.

The minister reviewed in detail the development of the Dominion since Confederation. The development of the country's trade in the past 60 years reflected her increasing importance in the economic system of the world, a growth, he said, which had not been surpassed in any other country.

Mr. Macdonald touched briefly on the number of Canadians who had gone to the United States. "When opportunities seemed greater for individual advancement," he said, "many Canadians moved to this great land and assisted in the development of it. Today, I believe, we are seeing evidence of the opposite swing of the pendulum. I firmly believe that no small place in the future development of Canada will be taken by the sons or former Canadians who have come to develop this great country. It is only natural that with a common language and no great intervening distances opportunities in Canada should appeal strongly to the citizens of this country just as opportunities here have appealed to Canadian citizens."

Black Bass In Saskatchewan Lake

Game Fish Brought From Minneapolis and Will Be Introduced To Prairie Lake

Fishermen who like to fight for their game will be able to enjoy their sport in the heart of the Canadian prairies in the very near future. For the first time, a prairie lake will open its waters to the gamey black bass when the Dominion Fisheries Inspector for Manitoba, brings to Kamsack, Saskatchewan, 4,000 fingerlings, which he is transporting in cans from Minneapolis. While the transfer is purely experimental, officials of the fisheries department are satisfied that the fish will do well in their new environment. They will be placed in Madge Lake and other waters near Kamsack.

Western Forest Reserves

Now Used Extensively For Summer Camps and Recreational Purposes

One of the attractive features in the development of Dominion forest reserves or national forests in the Prairie Provinces has been their growing use for recreational purposes. People hold picnics in the forests, camp out in them, seek in some, build summer cottages in desirable areas. This regulated recreational use of forest reserves in no way interferes with the carrying out of the main purposes, in the production of timber, the protection of stream-flow, etc., for which these areas were set aside.

Grow Enough Potatoes

Saskatchewan will have enough potatoes for her own needs this season without the need of importations, judging by the report of the Dominion Bureau of Statistics, which puts the crop at 3,611,000 cwt. or an increase of 87,000 over last year.

W. N. U. 1708

Winnipeg As Aviation Centre

Large Airplane To Be Built For Use Of Air Liners

Winnipeg is soon to be a great aviation centre with a large airplane to be built there from which air liners will leave regularly for all parts of Canada, according to H. A. Oaks, manager of the Western Canada Airways, which has moved its headquarters from Hudson to Ottawa. Three new monoplane have already been ordered by the company and not less than six are to be purchased next year. The new machines are made necessary by the growing popularity of air travel, according to company officials. During the first eight months of this year the company carried more than 1,000 passengers, about 200,000 lbs. of express, and flew 100,000 miles in 1,500 flying hours.

Beef Grading Plan

Meetings Held To Hear Evidence Of Producers, Retailers and Consumers

Proposals to grade beef for market as has been done in the case of eggs, butter, cheese and other products, are being considered by a commission appointed by the Dominion Government. This commission, which included R. S. Hamer, of the Dominion Livestock Branch, Ottawa, J. H. Evans, deputy minister of agriculture for Manitoba, F. M. Baker, representing the packing interests; R. A. Wright, president of the Western Canada Livestock Union, and L. P. McQuist, of Ottawa, held meetings during the past month, hearing evidence from producers, retailers and consumers as to the probable effect of a system of grading on the marketing of western beef.

Pasteurizing Milk in the Home

A Very Simple Method That May Be Used Without Trouble

Milk and its products are indispensable to the growth of the child and for the health of the adult, but in using it, especially for children, many persons like to be absolutely certain of its freedom from germs. Pasteurizing is the best way of obtaining this certainty, and the process can be easily carried out at the home if it has not already been done at the dairy. A simple method is described in a pamphlet on "Why and How to Use Milk," available at the Publications Branch of the Department of Agriculture at Ottawa. No elaborate or expensive equipment is necessary. If milk is bought in bottles, pour out a little and replace the caps. Insert a small glass dairy thermometer through a hole in the cap of one bottle, and set the bottles on a clean folded towel in a tin pail and pour in warm water until it reaches nearly to the top of bottles. Place the pail over a fire and heat until the thermometer registers 145 degrees F. Remove from the fire and let the bottles stand in the water for 30 minutes, re-heating if necessary to keep the temperature at 145 degrees. After 30 minutes pour in cold water and cool the milk as quickly as possible to 50 degrees. Keep as cold as possible until used. If there is no thermometer at hand the water should be heated until a little below boiling point and the bottles kept in it for thirty minutes. The pamphlet contains a large number of recipes in which milk is an important ingredient.

People With Historic Names

Several Come To Mind Who Are Living in England

The marriage in Westminster Abbey of Lady Jane Grey must make many people wonder how many other holders of historic names exist today. Two that come readily to the mind are: Sir Robert Peel, Miss Beatrice Lillie's husband and a lineal descendant of the great Prime Minister, and Sir Hereward Wake, unlike his prototype, who lived in the fens and provided the most thrilling story for boys. Sir Hereward Wake lives in Northampton.

Then again there is a haberdasher in the neighborhood of Trafalgar Square, called Charles James Fox. Of Robert Bruce there are several, and there is an equal number of William Wallaces, while the late professor of English poetry at Oxford was Sir Walter Raleigh.

Husbands are like automobiles—if you take care of them you don't have to get new ones all the time.

Indian Chief Treasured Perpetual Pass

An interesting incident is recalled by the recent celebration in honor of the memory of Chief Crow Foot whose wisdom and far-sightedness was largely responsible for the signing of the famous Treaty Number 7 which threw open a new empire in the west for settlement.

It was back in the '80's after the treaty with the "Necktie" Indians had been signed, and about the time the Canadian Pacific Railway was pushing its lines of steel into the west. Chief Crow Foot had become known to William Van Horne, then general manager of the Canadian Pacific and as a token of the esteem held for the famous chief by the whites, he was presented with a perpetual pass over

Cites Causes That Might Lead To War That Would Mean End Of Civilization

Research Work In Wool-Growing

Plan To Help Farmers and Manufacturers in Canada

Plans for research work in connection with wool growing and wool manufacturing in the Dominion with a view to helping both farmers and manufacturers were completed at a recent meeting in Toronto of a special committee of the National Research Council under the chairmanship of Dr. H. M. Tory, of Alberta. Dr. Tory urged the utilization for sheep raising of land in Canada unsuitable for other purposes, textile education through courses in technical schools, courses in universities and research in universities. Committees were formed to implement the plans outlined at this meeting.

An interim report on the quantities and qualities of wools used by Canadian mills disclosed the fact that the bulk of imported woolen goods were produced from types of wools which were or could be grown in Canada. Methods of testing Canadian wools for their suitability for manufacture into types of cloth used in Canada were discussed and the opinion expressed that there was a large and unexplored field for research in the chemical properties of wool.

Ranching In Alberta

Provinces Supplying Large Quantities Of Prime Beef For Eastern Markets

Though cattle ranching in Alberta is not now the extensive business it was twenty-five years ago, the annual feeder cattle show and sale held recently in Calgary, demonstrated that the ranches and farms of Alberta still supply large quantities of prime beef cattle to eastern and other markets. This year's show attracted a record number of competitive entries for the \$7,500 in prize money. Most of the land in Alberta that a quarter of a century ago was the exclusive pasture field of many thousands of beef cattle is now a productive mixed farming country, with dairying as one of the most profitable branches. Alberta is the third largest producer of butter of the nine provinces of Canada, with an annual output of about 20,000,000 pounds, and a yearly agricultural revenue valued at about \$225,000,000.

A live wire is a much nicer thing to be than to fool with.

Possibility of War between the United States and Great Britain, with Japan as a British ally and Canada neutral, is seen in the not distant future by Lieut. Commander J. M. Kenworthy, M.P., in his book, "Peace or War," soon to be published in the U.S.

"If events move in the next ten years as in the past nine," he writes, "England will stand at the head of a European federation of distrust against America. If after 1921, there is no renewal of the Washington treaty of 1921, the world will accept the possibility of a devastating Anglo-American war. It would mean the end of civilization and the ruin of human culture."

Commander Kenworthy, member of the English house of commons and former member of the admiralty war staff, sees mistrust between the British and American people as latent and easily capable of being fanned into a consuming passion. Upon the politicians of both countries he lays the blame for the conditions he alleges.

"We muddle and drift and blunder," he writes, "hoping for the best. We shall get the worst. The stupid professionalism of the experts is largely to blame for the gathering rivalry of the two nations in naval affairs. The still more stupid readiness of both governments to follow their counsels is even more culpable."

Jealousy of financial leadership of the United States, bitterness of the British people over payment of the war debt, and mounting commercial rivalry all are cited as factors in the situation the commander describes.

The writer says a naval alliance between Japan and Great Britain would bottle up the Panama canal and destroy the mobility of the United States fleet, leaving the nation at the mercy of its attackers.

Discussion of naval parity, security and preparedness, he writes, might well be abandoned at arms conferences for more important and immediately practical considerations. Chief among the latter, he says, would be settlement of the issue of naval bases, never discussed at the recent Geneva parity. There is no legal barrier, he points out, against modernization of British naval bases at Jamaica and Halifax, but in the event of war between the two nations such fortifications would be of tremendous strategic advantage to Britain.

Other war possibilities outlined in the volume include that of a conflict between Great Britain and Russia. The writer maintains that "rivalry in the Orient may bring an outbreak there sooner than is expected. Russian army officers, he writes, are ambitious for a conquering role.

An introduction to Commander Kenworthy's book is contributed by H. G. Wells.

Hens Lay Larger Eggs

Educational Work Of Poultry Associations Given The Credit

Because of the educational work of poultry associations and such organizations, hens are now laying larger eggs, was one of the main contentions of C. N. Han, Montreal, chairman of the Express Traffic Association, in urging the Board of Railway Commissioners at a session in Calgary, that the board grant permission to establish an estimated weight for billing of 58 pounds, for 30 dozen cases of eggs, instead of the present estimated weight of 55 pounds.

Waiting for something to turn up is one of the greatest obstacles to success.

SAYS CONDITIONS IN CANADA ARE NOW EXCELLENT

London.—Industrial conditions in Canada are excellent, and the outlook for 1925 is good, said F. W. Field, senior British trade commissioner in Canada, on his arrival at Liverpool aboard the Albatross. He emphasized that there was a marked desire for greater investment in the Dominion on the part of the United Kingdom.

It is probably true to say, continued Mr. Field, that business men and investors of the United Kingdom have taken a greater interest in Canada this year than in any previous years. The visit of the Prince of Wales and Premier Stanley Baldwin to the Dominion last summer made a deep impression, while the tour made by members of the Empire Mining Congress brought to the attention of mining men and empire capitalists the vast mineral resources of Canada.

"We had more calls at Montreal from British manufacturers and merchants than at any time previous," said Mr. Field. He emphasized that one cannot sell to Canada at long range because it is a market, above all others, in which the seller must go to the buyer.

Airplane Companies Are Cutting Prices

British and French Competing in Cross-Channel Service

London.—A price war between the French and the British airplane companies competing in the cross-channel service between London and Paris was revealed when French Air Union officers here announced further cuts in both first and second class fares, in answer to the Imperial Airways inauguration of a second class service. The French line also announced that it would make effort to cut the time between the capitals as well as the fares. The average time is now two hours and a half, but new planes which will have the latest Lore-Olivier engines will be scheduled to make the trip in two hours and 11 minutes.

As a result of the price war, it is only 17 shillings more expensive to go to Paris by air second class than the first class railroad fare and the saving of time is four and a half hours.

Went, Expert Advice

Mexico City.—Sir Henry W. Thornton, president of the Canadian National Railways, has been invited to come to Mexico City to study the financial condition of the National Railways and to suggest a plan for their reorganization in order to place them on a paying basis. The Mexican treasury department has announced officially. The invitation was extended to Sir Henry by President Calles.

U.S. Consulate At Nanking Robbed
Peking.—The safe of the United States consulate at Nanking has been broken open and its contents stolen, according to official reports to foreign sources here from Nanking. The contents included colonial silver, heirlooms belonging to John K. Davis, the consul. Bound volumes of the consulate correspondence are being hawked on the streets of Nanking for a few cents as waste paper.

Arctic Explorer Granted Review
Washington, D.C.—Dr. Frederick A. Cook, Arctic explorer, was granted a United States supreme court review of his suit for release from Larchmont federal prison, where he is serving a sentence of 11 years and 6 months for using the mails to defraud.

To Renew Timber Supplies
Victoria.—The lands department has leased a plot of land near this city where forest trees of this province will be grown from seed and planted artificially to renew timber supplies for a future generation.

Total Casualties In Boat Disaster
Rio Janeiro.—A total of 314 persons perished in the Principessa Mafalda disaster off the coast of Brazil. It was shown in final figures made public by the local office of the Navigazione Generale Italiana, owners of the vessel. There were 645 survivors.

W. N. U. 1706

League Now Virtually Universal In Scope

So Long As Nations Co-Operate Membership Not Essential

Geneva, Switzerland.—The League of Nations' dream of universality practically has become a reality. The United States is now participating in virtually all league activities, save those which are political, and the Soviet Government has decided to take part in the league's preparatory disarmament conference.

League observers contend eight years' experience has demonstrated it is unimportant whether nations are members of the international body so long as they willingly co-operate in the league's activities.

Both the Soviet Government and Turkey already are collaborating in the league's economic activities, while Mexico has sent an official observer to the economic conference.

Thus Ecuador is virtually the only nation in the world not yet collaborating and, therefore, the league now regards its activities and influence as virtually universal in scope.

Noted Author Loses Sight Of Right Eye

Booth Tarkington, Threatened With Blindness, Is Undergoing Treatment

New York.—Booth Tarkington, author of "Monsieur Beaucaire," the "Penrod" series of boy stories and many other literary successes in novel, play and short story form, has lost the sight of his right eye and is undergoing treatment at the hands of Dr. John Ray Newcomb, eye specialist of Indianapolis, to save the sight of his left eye, which has been threatened. At his home in Kennebunkport, Me., Mr. Tarkington disclosed that he had lost the sight of his right eye about a year ago.

"I burst a blood vessel, and gradually my eyesight went out," said Mr. Tarkington. "For a time I was threatened by nearsightedness in my left eye, but under strenuous treatment my left eye has improved, and I am now able to use it in my work."

South Africa Receives Message From King

King George Expresses Gratitude Over Settlement Flag Controversy

Cape Town, South Africa.—A message from King George expressing gratitude over the amicable settlement of the flag controversy in South Africa, was read in the House of Assembly and greeted with applause. The message was read by Premier J. B. M. Hertzog, as follows:

"I wish to express my heartfelt satisfaction over the solution of the flag question, and I earnestly trust that the spirit of tolerance, conciliation and goodwill may continue to animate all parties to unite for the common weal."

Another Use For X-Rays
Dallas, Tex.—Doctors at Baylor University here have discovered that they can determine with an X-ray whether or not a person is hungry. Experiments have been made for some time in observing the hunger contractions of the stomach muscles, but it was only recently that the action could be clearly seen and photographed.

Amassed Large Fortune

Ottawa.—Starting life as a cab driver, Joseph Biopelle died here, at the age of 52, credited with having amassed a fortune of \$400,000. As soon as he had saved sufficient money from his cab driving, he commenced in lumber logging and later started the financial business which bears his name.

Flying Contest For Colleges

London.—An Oxford-Cambridge flying contest may be added to the annual list of trials of strength between the two universities. Both now have their own air squadrons and the Cambridge squadron claims that its members collectively have flown a distance equal to three times around the world.

Princess Hermine's Son Dead

Berlin.—Prince George Wilhelm von Schoenach-Carolath, son of Princess Hermine and stepson of former Emperor William, died at a hospital at Grunberg, Silesia, from injuries which he suffered in a motorcycle accident.

Sister of Conservative Leader

Here is the new Conservative leader's "little sister." Miss Mildred Bennett sister of Hon. R. L. Bennett, from a recent photograph.

War On Small Envelopes

Post Office Department Has Endless Trouble With Smaller Sizes

Ottawa.—The Post Office Department has declared war on small envelopes and milady's dainty envelope is soon to be a matter of history. Primarily responsible is the new cancellation machine adopted by the postal authorities. In the operation of the cancellation machine, if the envelope be small the cancellation stamp is liable to interfere with the address. Then again small containers are liable to become lost through dropping out of letter handles. Manufacturers have agreed not to turn out any more small envelopes, and no small Christmas cards necessitating the use of tiny envelopes will be made.

Victory Loans Redeemed

Twenty-nine Million Dollars In Bonds Retired From Revenue

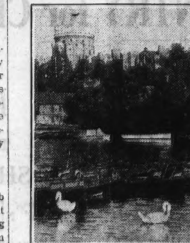

Ottawa.—Canada on Nov 1 redeemed 29 million dollars 5 1/2 per cent. five-year Victory renewal loans, Hon. J. A. Robb, Minister of Finance, has announced. The amount was retired from revenue. Eight million dollars, in treasury notes, which fall due on November 15, will probably also be taken off the market and redeemed from revenue, Mr. Robb intimated.

A further Dominion maturity of six-three millions in 5 1/2 per cent. Victory loan is due on December 1.

Stunt Pilot Killed

Dessau, Germany.—The Junkers Company's crack stunt pilot, Karl Plath, was killed when his plane crashed to the ground from an altitude of 3,000 feet. The plane fell while he was executing a nose dive. He tried in vain to right the machine when he reached an altitude of 1,200 feet.

Windsor Greets Windsor

Although the Fates decreed that Windsor, Ontario, should not be allowed to send by air an expression of its best wishes to Windsor, England, yet the inhabitants of the English town were apparently determined that a message of goodwill should not go unaided. Among the Canadian Pacific Express Co.'s shipments aboard the "Montclair" recently was to be found this expression of friendship in the form of a shield of oak made from the Windsor Forest where many Canadians were camped during the Great War. The shield bears the municipal arms of the Royal and ancient Borough. Its charter being granted in 1276 by Edward I.

The shield, which has gone forward to Windsor, Ontario, is the gift of Sir William Carter, Mayor of the Eng-

New Service On Bay Line

Additional 70 Miles Of Track Improve Train Facilities

Winnipeg, Man.—With the addition of 70 miles of line and a better connection at The Pas with the Winnipeg trains, an improvement in train service on the Hudson's Bay Railway came into effect on Thursday, November 3. Trains will leave The Pas every Thursday at 11 a.m., reaching Pilewitone at 11 p.m., departing from Pilewitone 8 a.m. Friday, arriving at the present terminal, Mile 286, at 1 p.m. and reaching the end of track, Mile 356, at 6 p.m. The new portion of the line is between Mile 286 and Mile 356. Returning, the train, which is a mixed, will leave Mile 356 at 8 a.m. Sunday, arriving at Pilewitone at 6 p.m. the same day and leaving there for The Pas at 1 p.m. Monday. The Pas will be reached at 4 p.m. Monday. Trains leaving Winnipeg Wednesday will arrive at The Pas at 8 a.m. Thursday, and trains leaving The Pas for Winnipeg will pull out at 6.20 a.m. Monday.

Storm Takes Death Toll

Shipwrecks and Great Loss Of Life On British Isles

London.—The death toll of the recent storms in the British Isles mounted to 71, with news of 50 shipwreck deaths in Ireland.

Thirty-one seamen were drowned at Cleggan Bay, while 19 lost their lives at Kinsale and Jackson.

Lloyd's reported that 17 small vessels were destroyed by the gales, which reached a velocity of 80 miles an hour. Officials estimate several thousand homes were wrecked by floods and winds.

All Canadian Dinner

Will Be Feature Of Celebration Of Canada's Agriculture Jubilee

Ottawa.—An "all-Canadian" dinner will be a feature of the celebration of Canada's "agricultural jubilee," which is to have its climax at the Royal Agricultural Winter Fair to be held in Toronto from November 16 to November 24. This announcement was made tonight by the Hon. W. R. Meagher, Dominion minister of agriculture, who will be the host on behalf of the Federal Government. Only food that is the product of Canada will be found on the tables.

Hen Sells For \$500

Vancouver.—An announcement has been made by the poultry department of the University of British Columbia of the sale of a White Leghorn hen for \$500. The hen was known as F. 319, and was exhibited at Ottawa last summer. Last year she laid 235 eggs in 265 days. F. A. Sansome, Greenwich, Conn., is the purchaser.

Windsor Greets Windsor

Although the Fates decreed that Windsor, Ontario, should not be allowed to send by air an expression of its best wishes to Windsor, England, yet the inhabitants of the English town were apparently determined that a message of goodwill should not go unaided. Among the Canadian Pacific Express Co.'s shipments aboard the "Montclair" recently was to be found this expression of friendship in the form of a shield of oak made from the Windsor Forest where many Canadians were camped during the Great War. The shield bears the municipal arms of the Royal and ancient Borough. Its charter being granted in 1276 by Edward I.

The shield, which has gone forward to Windsor, Ontario, is the gift of Sir William Carter, Mayor of the Eng-

ENTIRE CREW OF JAP VESSEL DIE OF STARVATION

Port Townsend, Wash.—Dead, of starvation, despite evidence that indicates they devoured the bodies of seven or eight of their shipmates, the last few to survive of the crew of the Japanese fishing boat, the Higo Yui Maru, meaning "Good and Prosperous," arrived here aboard their pilotless vessel after drifting with the sea currents more than 4,000 miles from the coast of Japan.

Physicians from the United States quarantine station here who went aboard the fishing boat said there was no question but that cannibalism had been practiced by the last survivors of the crew. The bones of seven or eight human beings were found aboard the boat, which bore unmistakable evidence of many months at sea.

The boat was picked up by the freighter Margaret Dollar off the Washington coast and towed to the quarantine here.

The bodies of the two Japanese were found in bunks in the tiny dark cabin aft of the engine room. They were in natural positions as if they had failed to awaken from a deep sleep.

The boat was about 55 feet long, 15-foot beam and 12 feet deep, was equipped with a gasoline engine in addition to canvas and bamboo sails. The sails were torn to shreds by gales and standing gear on the deck was twisted and broken. The hull was made-encrusted and dragging seaweed two feet in length.

Barely decipherable Japanese characters scrawled upon a board in the death ship's cabin gave a meagre record of the last days of the starving crew.

The writing was said to indicate that the ship drifted helplessly for seven months after the captain and crew of 12 despaired of repairing their stalled gasoline engine. Three months ago the crew had given up all hope of living when they saw the first of their number taken by death, the scrawled and faded script in the cabin revealed.

Research Bureau Of Education Urged

Would Develop System Of Instruction Says Dr. Robert Fletcher

Winnipeg.—Establishment of a Dominion research bureau of education for improving the teaching machinery in such a way that the youth of the land would learn more in the same given time, was urged by Dr. Robert Fletcher, B.A., LL.D., deputy minister of education for Manitoba, speaking as president at the opening of the fourteenth annual meeting of the Canadian Educational Association here.

Such a bureau would render very fine service to the province without encroaching in any way on the special educational prerogatives which belong to each and which all regard so jealously, declared Dr. Fletcher. He pointed out that the necessity for careful research in both the methods of teaching and the material to be taught was more and more forcing itself upon the attention of educators.

Asking Protection For Salmon Fields

Delegation From B.C. May Request Government To Enforce Closed Season

Ottawa.—A delegation representing the fishing industry in British Columbia have gone to Ottawa prepared to meet Federal Government officials regarding the conservation of salmon and other species in the coastal and inland waters.

J. N. Ellis, of Vancouver, one of the delegates, states that it is quite likely the government will be asked to enforce a closed season in order to safeguard the future supply of salmon.

Cancels Boycott Against U.S.

Mexico City.—President Calles has cancelled the decree issued last May forbidding government departments to make purchases from the United States as a reprisal for the embargo established on certain shipments belonging to the Mexican Government.

Here and There

What is considered the largest grizzly shot in the Canadian Rockies this season was taken by Miss A. Van Vleck, daughter of Ernest Van Vleck, prominent New York architect who headed a hunting party into the Selkirk district. The party went in north of Revelstoke.

An amount of grain greatly in excess of the entire production of western Canada in the year 1937, 4,454,000 bushels, were hauled to elevators over Canadian Pacific lines in one day in the west during the middle of October. This constituted a record haul of grain for this railway company.

The second shipment of horses from Canada to Russia has begun to receive grain, according to Louis Kon, Soviet representative, there being only one horse that died during the passage. The next shipment is expected to go forward in November, and this will bring the total number up to 3,300.

G. N. Torgren, ex-M.P. for Sweden, recently left for the Peace River Country in order to locate suitable farm land for the establishing of a large colony of Swedish farmers, who are said to be in a position to undertake farming on an extensive scale. He has already canvassed Mexico and the Southwestern States, which he finds unsuitable.

The new Canadian Pacific Railway elevator at Midland has begun to receive grain, and shortly all the construction work will be complete and all departments of the plant in operation. The opening of this elevator marks the extension of Canadian Pacific enterprise to another port on the Great Lakes and a new factor in retaining a greater proportion of the Canadian export grain trade for Canadian ports.

The largest party of major league baseball stars to hunt moose in New Brunswick entered the woods for a two-weeks stay after the World Series. The party entered at Clarendon on the Canadian Pacific main line and included Benny Bough, Mark Koenig, Eddie Collins, Joe Bush, Sam Jones, Fred Hofman. A number of newspaper writers and cameramen were included in the party.

The two new Canadian Pacific passenger ships, "Duchess of Athol" and "Duchess of Bedford" now being built for the St. Lawrence route (Liverpool to Montreal), will be two of the finest vessels afloat, according to plans and specifications. Their gross tonnage will register 20,000. They will be twin screws with geared turbine engines. They will have a length of 595 feet, a breadth of 76 feet and a speed of 17 1/2 knots. Both ships will have accommodation for 572 cabins, 480 tourist third class and 558 third class passengers.

The initial consignment this year of Canadian apples for Great Britain, has gone forward on the Canadian Pacific liner "Montrose" from Montreal. They are consigned by the Fruit Branch of the Dominion Department of Agriculture from the Province of Ontario and consist of forty standard boxes containing about 4,000 apples to be put on exhibition at the Imperial Fruit Show scheduled to be held at Manchester this month. Varieties include Golden Russet, McIntosh, Spies, Greenings, Stark, Talman Sweet, Wolf River, Cran Pippin and Redstar. On the same vessel are 25 cases of vegetables also for exhibition in England.

Says Marriage Prolongs Life

Wives Live Longer Than Single Women Declares Actuary

Married women live longer than single women, according to the British Government Actuary, Sir Alfred Watson.

In a report on life tables based on the population as returned in the 1921 census, and on the average number of deaths recorded in the three years 1920-22, rates of mortality for single, married and widowed women show that the advantage lies with the married woman.

At the youngest ages for which comparison was possible, the highest rates were those for single women. Rates for single and married women differed but slightly between the ages of 24 and 37, but thereafter the rates for married women were usually lower than those of single women or widows, while rates for widows were invariably heavier than those for single women or wives.

What is wrong with the tea? If this question is ever asked at the table you may find that the tea you are using was in a poor package. Careful experiments have proven that Aluminum is the only fit package to keep good tea in. You should try Red Rose Tea and see how fresh and brisk and pungent it is in the Aluminum package.

low-passengers, but she lingered over her meals in the diner to watch them, wondering about each of them: Did they all know where they were going? Had they people to welcome them when they arrived at their destination, or were they like her, just going some place to be away from some other place? She wondered, if one kept on going, going, going, would every disagreeable thing fall away, every sin and every sadness? As she looked out over the melting fields, the air was so sweet and purifying—it would surely wash away everything that one did not like to remember—and how that trust did eat up the salt—throbbing, pounding, beating, unrelenting and tireless! She tried to see if the telephone poles were all the same distance apart by counting on her fingers at the same rate of speed. Sometimes she could get to ninety, but more often a pole came in at eighty-seven.

Helm! felt the distinction of riding in the drawing-room all alone. It seemed to have about it a proud aloofness, with its own little wash-room and towels, and abundance of room, while the car outside was crowded. It flattered her, too, to notice how attentive the porter was, though she was shrewd enough to connect it with the generous tip which she knew Mrs. St. John had given him, engineering in him thereby that gratitude which shades delightfully into antipathy.

Mrs. St. John had told her that when she went for her meals it would be well to carry a book—a book keeps acquaintance at a distance, for it plainly means "Keep away! can't you see I'm occupied?"—and just now conversation was not desirable. Helm!s plainness—recently betrayed her. All these instructions, hurriedly given though they were on the way to the station were strictly obeyed. She remembered to walk languidly, yet generously and betray no open interest in her surroundings. It was well to let her fellow travellers think that travelling was an old tiresome experience for her. When she yawned she pulled her mouth tightly.

A tired mother with a swarm of sticky children occupied a double seat half-way down the car. When Helm! came out of the drawing-room and passed them on her way to the diner, the woman looked after her unenviably. "I hope that boy will be a well off," she said. "Gosh! it's one that ought to have that place to myself with this gang of mine, where I could wallop them in peace, without having folk stare at me. But ain't it the way of the world that that he gets! People with big families have small houses; people in big houses have none at all. It sure does seem strange—but what can a person do? Maudie, I'll lay you-could if you don't stop teasing the baby?"

When Helm! was on her way back the family was in a state of extraordinary commotion. Charley, the five-year-old, was getting a temporary

cleaning up by the method known as a "spit-wash," the young man objecting noisily, not to the method alone, but to the whole basic principle. In addition to her operations on Charley the mother was trying to quell the riot that had broken out between Maudie and the baby over the finding of a nut-bar in the general turmoil of coats, hats, oranges, bags and toys which were wedged in between the children on the seat. "Maudie, stop! Don't take it from him—let him eat it." The baby had the nut-bar. Maudie hoarsely protested. Maudie's voice was hoarse with roaring. Maudie had to roar if she were to be heard above the family chatter. "Oh, leave him alone while he's good!" cried the mother in despair. "Let me have a moment's peace, even if it does make him sick. I'll give him castor oil to-night. Stand still Charley, or I'll lay you cold!" Then it was that Helm! forgot her instructions, forgot that she was a fugitive from the law—she only knew that here, were people who needed a friendly hand of the sort that she could supply.

(To Be Continued.)

Worse Than Infantile Paralysis

Infantile paralysis is a flexible compared to rheumatic fever in the opinion of Dr. John Meskinen, of McGill University, who spoke at the post-graduate medical conference in Kansas City. The symptoms of rheumatic fever often are found in five-year-old children and are wrongly called growing pains, he said. In a large number of cases this develops into heart disease.

GUARD THE CHILDREN FROM AUTUMN COLDS

The Fall is the most severe season of the year for colds—one day is warm, the next cold and wet, and unless the mother is on her guard, the little ones are seized with colds that may hang on all winter. Baby's Own Tablets are mother's best friend in preventing or banishing colds. They act as a gentle laxative, keeping the bowels and stomach free and an occasional dose of the Tablets will prevent colds, or if it does come on suddenly their prompt use will relieve the baby. The Tablets are sold by medicine dealers or by mail at 25c a box from Dr. J. C. Williams' Medicine Co., Brockville, Ont.

How Turkey Handles Speeders

Patrolman Instructed To Throw Nails In Their Path

A unique method of combating the tendency of Constantinople motorists toward excessive speeding has been put into practice recently. The mayor, in addition to providing for a motor cycle traffic squad, has issued instructions that the patrolman be provided with short nails to throw in the path of recklessly speeding drivers. Constantinople's narrow, tortuous, cobble and brick streets are no bar to the chauffeurs, who drive at break-neck speed, causing many casualties. The mayor says the next campaign will be against excessive noise. He sees no reason why the ordinary automobile should sound like a fire engine answering a call.

Worms, by the irritation that they cause in the stomach and intestines, deprive infants of the nourishment that they should derive from food, and mal-nutrition is the result. Miller's Worm Powders destroy worms and correct the morbid conditions in the stomach and bowels that are favorable to worms, so that the full nutriment of the child is assured and development in every way encouraged.

The British Policy

Helping Other Lands To Achieve Best Possible Results

Dr. Adams, emeritus Vice-Principal of McGill, who has returned from a visit to the East, says that the British have made Palestine prosperous. Brigandage has been suppressed, roads have been improved and extended, and reforestation is being studied. Order has replaced disorder and the inhabitants are benefitting. The military force, numbers but a thousand, two hundred of whom are British. The High Commissioner is Lord Plumer, a great soldier, who is also a most capable administrator. The improved conditions in Palestine are in the nature of things. It is the British way to help other lands and peoples to achieve the best possible results. Montreal Gazette.

Girls beg the question when they try to induce men to propose. Minard's Liniment for Glibbians.

OUT OF 83

cases ended in death! So a recent Canadian investigation showed. These were not cases of infectious diseases—of consumption—of typhoid! They were cases where a person had sustained some slight injury—a cut, a burn, a wire-prick—and where the wound, being thought not serious enough for careful treatment, had been neglected. Blood poisoning and death resulted. When you or your children sustain any injury, ensure against infection by applying Zam-Buk. This balm soothes the pain, stops bleeding, and by destroying all germs prevents blood poisoning, etc. Hence no time need be lost from work or pleasure by those who use Zam-Buk. All dealers, 50c. box.

Zam-Buk

Little Helps For This Week

In the fear of the Lord is strong confidence, and His children shall have a place of refuge.—Prov. xiv, 26.

Have faith in God; for He who reigns on high. Hath borne thy grief; and hears thy supplication; still to His arms thy only refuge fly.—Have faith in God. —Anna Shipton.

Trust Him; trust Him about every one and everything, for all time and all needs; earth and heaven, the conquest of sin, the growth of holiness, the cross that chafes, the grace that stirs. To trust God glorifies and honours Him.—Thorold.

No surgical operation is necessary in removing cataracts if Holloway's Corn Remover be used.

Now that we have a self-operating typewriter we are very much in need of a machine that will get busy and do our thinking.

The BABY

No mother in this enlightened age would give her baby something else that did not know was perfectly harmless, especially when a few drops of plain Castoria will right a baby's stomach and almost any little ill. Profoundness and fever, too; it seems no time until everything is serene. That's the beauty of Castoria; its gentle influence seems just what is needed. It does all that castor oil might accomplish, without shock to the system. Without the evil taste, it's delicious! Being purely vegetable, you can give it as often as there's a sign of colic; constipation; diarrhoea; or need to aid sound, natural sleep. Just one warning; it is genuine FLETCHER'S CASTORIA, that physicians recommend. Other preparations may be just as free from all doubtful drugs, but no child of this writer's is going to test them! Besides, the book on care and feeding of babies that comes with FLETCHER'S CASTORIA, is worth its weight in gold.

Children Cry for Fletcher's CASTORIA

LESSON No. 15

Question: Why is emulsified cod-liver oil so important as an added ration with milk in the diet of children?

Answer: Because when it is mixed with milk it makes milk a more efficient rickets-preventing food and builder of strong bones. Children like it best in the form of

SCOTT'S EMULSION

PAINTED FIRES

BY NELLIE L. McCLUNG

Copyright, Canada, 1925

CHAPTER XI.—Continued.

Helm! carefully studied her ticket—a pale mauve strip of paper with a yellow back, on which were strange words. She saw the names Stankov, Edmonton and Eagle Mines. Evidently this ticket was her destination. Mrs. St. John told her she was going to a lovely spot in the mountains where a lot of men worked in mines. Mrs. St. John had heard her husband speak of it, she said. Helm! shrugged her shoulders doubtfully. A mine where a lot of men worked did not sound very attractive. It would mean that she would have to cook, scrub bare floors, wash big white cups with ugly tea-stains, and have no good times at all. She would rather stay in the city, where she would find a girls' club, and go to suppers in basements, and play basket-ball in school-yards; and see lovely dresses in shop windows, and eat ice-cream cones, and perhaps have better chances at night school; then on Sundays she would go to church and hear a lovely organ with a sweet religious sound, and perhaps she might find another Miss Abbie.

Helm! now recalled Aunt Lili's advice, and felt foolishly sad and over again—"Leave me alone—they break your heart." She decided that she would always remember this. Girls were best, nice girls like Lucy Powers and Hattie. She wished now that she could write Lucy and Hattie and tell them everything, but Mrs. St. John said she was not to write to letters. The Girls' Friendly would try to find her and bring her back, go she must give them no clue.

CARRIED WIFE TO BED

Suffered So She Could Not Walk. Restored to Health by Lydia E. Pinkham's Vegetable Compound

Mining, Ontario.—"I am a practical nurse and I recommend Lydia E. Pinkham's Vegetable Compound to suffering women. For three months I was almost helpless and could not sit at the table long enough to drink a cup of tea. My husband and my husband carried me to bed, I would be so weak. Then he read in the paper of a woman named Mrs. Adams who got better after taking the Vegetable Compound, so he went and got it for me. When I had taken three bottles I was just like a new woman and have had splendid health ever since. When I feel any bearing-down pain I always take it; sometimes a half bottle or whatever I need. It is my only medicine and I have told many a one about it. Any one wanting to know more about Lydia E. Pinkham's Vegetable Compound, I will gladly write to her. I do all I can to recommend it for I feel I love my life and strength to it." —Mrs. Neal, Bowser, R. R. 1, Mining, Ontario. Do you feel broken-down, nervous, and weak, sometimes? Do you have this horrid feeling of fear which sometimes comes to women when they are not well? Lydia E. Pinkham's Vegetable Compound is excellent to take at such a time. It always helps, and if taken regularly and persistently will relieve this condition.

Large Pimples Lasted A Year Cuticura Heals

"My face and neck were all covered with pimples. They were red, hard and large and festered and scaled over. For a while the itching and burning were so severe that I could not help scratching, and my face was inflamed and I lost much sleep about a month on account of the irritation. The trouble lasted one year."

"I used other remedies but they failed to help me. I sent for a free sample of Cuticura Soap and Ointment. After using it I purchased one cake of Cuticura Soap and one box of Cuticura Ointment and a month and a half I was healed." (Signed) Miss Emily Dool, Riverton, Man. Clear the pores of impurities by daily use of Cuticura Soap, with touches of Cuticura Ointment as needed, to scotch and heal. Cuticura Talcum is fragrant and refreshing, an ideal toilet powder.

Small box and sample of Cuticura Soap and Ointment sent free by mail. Write to The Cuticura Sales Company, 150 N. 3rd St., St. Paul, Minn.

Canadian Buyers Profit by Canada's Export Trade

In the distant reaches of Britain's far-flung empire you will find General Motors cars, built in Canada by Canadian craftsmen, from Canadian materials.

In five years over 110,000 automobiles have been sent overseas by General Motors of Canada to carry the standard of Canadian quality around the world.

This represents a truly important contribution to Canada's export trade.

It represents millions of dollars to be spent in wages to Canadian workmen, in the purchase of Canadian metals, wood, hides and

the countless other materials entering into the manufacture of General Motors cars.

And it represents a greatly augmented production of General Motors of Canada, resulting in lower costs of manufacture, in economies of purchasing, in greater savings of time and labor through greater volume.

Thus, because in India, in Egypt, in Malta, Ceylon or South Africa, someone is buying a General Motors car from Canada, General Motors can offer to you, in Canada, a product of higher quality at a lower price than otherwise possible.

about yours.

Stony Plain and District.

Kathleen, the young daughter of Mr and Mrs Jacob K. Mayer, died on Tuesday, Nov 1st, from meningitis. She had been ill but a short time. The funeral took place on Thursday.

Mr Thos Fitzpatrick reports the theft of practically a whole quarter of beef last week. He had cut this into convenient pieces, packed it away, and on going out Saturday morning found it had been stolen all excepting the shank. Tom doesn't suspect anyone in particular, but thinks it couldn't have been done by an Irishman, as no true Son of Erin would purloin meat on a Friday.

A resident of Goffe-avenue had his hen coop invaded on Thanksgiving evening and a half-dozen of his prize pullets removed.

Josef Engleman will hear of something to his advantage by sending his present address to The Sun Office.

Mr James H. Coates is having installed in his new residence, south of Duffield, new plumbing, heating and lighting systems, the work being done by a staff from Stony Plain Hardware.

The Signal is the name of the new weekly newspaper published at Jasper. Mr J. L. Hollingshead, well known in Stony, is the editor and publisher.

M. M. Mecklenburg, the well known optical specialist, will be at the Royal Hotel, Stony Plain, on Friday, November 25th. See him and see well.

Charge of Assault Dismissed.

In an Edmonton Court, last week, His Honor Judge Crawford presiding, William Spicer, a farmer of Manly district, was charged with assault on Mrs Wm Pawlow.

After considerable evidence, of a very conflicting nature, was given, the Judge decided to give accused the benefit of a doubt, and dismissed the case. F. W. Lundy was counsel for the defendant. A number of the witnesses did not speak the English language fluently, and the services of the Court interpreter were required for these; but when an interpreter was asked for a grown girl, born in this country, His Honor Judge Crawford expressed his opinion that the young people of Alberta should be required to learn the language of this country.

Spruce Grove News

The Ladies' Aid of United church gave a chicken supper Friday evening last, which was well patronised.

There will be a whist drive and basket social, under the auspices of St Joseph's parish in Winterburn hall, on the evening of Wednesday next, Nov. 16. A musical program will be given by the Foster orchestra of Edmonton.

H. A. BROWN,

whose appointment as Vice-President and General Manager of General Motors of Canada, at the age of 37, marks him as one of the youngest higher executives in the automotive industry. Mr. Brown has been connected with the General Motors organization for a number of years, having held the position of comptroller at Oshawa since September, 1924. He succeeds Gordon LeFebvre, who has assumed an important post with the Oakland Motor Car Company at Pontiac, Michigan.
